Alaska Municipal League Investment Pool

Series I & II Portfolio Characteristic Comparison

Investment Strategy and Objectives for Series I

The pool is to invest in short dated high-quality securities with the intent to maintain a stable \$1.00 net asset value and an AAAM stability rating by S&P, while meeting three objectives:

- 1) **Preservation of capital**—seek to preserve the capital investment of all participants through prudent management
- 2) **Liquidity**—seek to meet the needs of participants for cash marketing a high level of portfolio liquidity and investing in readily marketable securities
- 3) **Return**—seek to attain the highest level of return consistent with the objectives of preservation of capital and liquidity

Investment Strategy and Objectives for Series II

The strategy of the Series is to invest in high-quality securities with greater risk and potential return than AMLIP Series 1, having a portfolio target weighted average life 120-180 days with a variable rate net asset value, while meeting three objectives:

- 1) **Preservation of capital**—seek to preserve the capital investment of all participants through prudent management
- 2) **Liquidity**—seek to meet the needs of participants for cash marketing a high level of portfolio liquidity and investing in readily marketable securities
- 3) **Return**—seek to attain the highest level of return consistent with the objectives of preservation of capital and liquidity

Redemption Policies

Redemptions of all, or any part, of a participant's units may be made on Pool business days during the hours of 8:00 a.m. and 5:00 p.m. EST. A participant may redeem any amount it wishes, and have it transferred to any predesignated bank account by contacting the custodian.

For Series I, there is same day access to capital.

For Series II, all redemption requests are subject to a 3-business-day hold period. The 3-business-day period becomes effective upon the receipt of an executed trade request form received by 10:30am AKST.

Risks to the Pool:

- **Interest Rate Risk**— When short-term interest rates fall, the series yield is likely to fall. When interest rates increase the series net asset value could decline.
- **Credit Risk**—The issuer of a security could fail to pay interest or principle in a timely manner. The default or decline in credit quality of individual securities within the pool could pressure the net asset value.
- **Liquidity Risk**—The series net asset value could decrease during times when there are abnormal levels of redemption requests or markets are illiquid.

Disclosures:

All data is as of the date indicated and subject to change. The information in this fact sheet is based on data obtained from recognized sources and is believed to be reliable. Past performance is not indicative of future results. The series will be managed with a floating net asset value. The pool's sponsor has no legal obligation to provide financial support to the pool, and you should not expect that the sponsor will provide financial support to the pool at any time. Redemption is at the then current net asset value which may be more or less than the original cost.
