The Alaska Municipal League Investment Pool (AMLIP) is a non-profit corporation formed by the Alaska Municipal League to provide investment services under the Alaska Investment Pool Act of 1992. The purpose of AMLIP is to provide a safe short-term investment option to maximize revenue for boroughs, cities, school districts and other state government entities.

Investment Strategy and Objectives

The strategy of the Series is to invest in high-quality securities with greater risk and potential return than AMLIP Series 1, having a portfolio target weighted average life 120-180 days with a variable rate net asset value, while meeting three objectives:

- 1) **Preservation of capital**—seek to preserve the capital investment of all participants through prudent management
- 2) **Liquidity**—seek to meet the needs of participants for cash marketing a high level of portfolio liquidity and investing in readily marketable securities
- 3) **Return**—seek to attain the highest level of return consistent with the objectives of preservation of capital and liquidity

Liquidity Summary

Credit Quality

As of 3/31/2025

Redemption Policy:

Redemptions of all, or any part, of a participant's units may be made on Pool business days during the hours of 8:00 a.m. and 5:00 p.m. EST. A participant may redeem any amount it wishes, and have it transferred to any predesignated bank account by contacting the custodian.

For Series II, all redemption requests are subject to a 3-business-day hold period. The 3-business-day period becomes effective upon the receipt of an executed trade request form received by 10:30am AKST.

Risks to the Pool:

Interest Rate Risk: When short-term interest rates fall, the series yield is likely to fall. When interest rates increase, the series net asset value could decline.

Credit Risk: The issuer of a security could fail to pay interest or principle in a timely manner. A default or decline in credit quality of individual securities within the pool could pressure the net asset value.

Liquidity Risk: The series net asset value could decrease during times when there are abnormal levels of redemption requests or markets are illiquid.

Disclosures:
